

PR STOCK PRO

A comprehensive inventory management app for retailers. This user-friendly Android application has clear navigation and extensive functionality to manage inventory in-store.

What sets PR Stock Pro apart is its universal compatibility, the app works seamlessly with 90% of POS and inventory management systems.

PRODUCT FEATURES

A UNIVERSAL INVENTORY MANAGEMENT APP FOR RETAILERS

- ✓ **Price Check:** Conduct quick price checks by scanning barcodes. Price checks will display price, sales price, SKU, and quantity in stock.
- ✓ **Stocktake:** Efficiently conduct stock takes by creating, viewing, and editing counts, bin locations, and quantities. Retailers can switch between quick scan and quantity scan options. Scan any items not in the product file for later documentation and addition to the current system.
- ✓ **Count Review:** View detailed stock take information including total counts, counts by bin location, and count date and time for accurate stock management.
- ✓ **Transfer Orders:** Create transfer orders with ease, enabling efficient transfer of stock between locations. Options to add multiple transfers simultaneously and send orders directly to PC.
- ✓ **Purchase Orders:** Generate and receive purchase orders effortlessly, with the ability to scan items, specify quantities, and include supplier details. Export purchase order data for seamless processing.
- ✓ **Seamless Import of Item Data:** Easily import lookup files from either internal storage or PC. This can be automated to update the app on opening.
